Melamine Washing Instructions

To assure the long life of Carlisle Melamine Dinnerware, proper handling is essential. Key points to follow when washing include:

1. Avoid using abrasives or copper/brass scouring pads when removing stains. A woven plastic pad or polyester brush (40113 or 40542) will yield the best results without dulling the lustrous finish.
2. Ask your chemical salesman for the proper solution formulated for use with melamine.
3. Do not use chlorine or chlorine-based products when attempting to remove stains.
4. For best results, use a high-alkaline base solution for regular dishwashing.
5. If unusual staining occurs, before placing trays in dishwasher, pre-soak melamine in a sodium perborate base solution such as Dip-It by Ecolab, Inc. or DeClare Plus by Diversey/Lever.

HOW TO CARE FOR YOUR MAPLE BUTCHER BLOCK

- This is a solid hard rock maple butcher block. To maintain the original patina of the wood, clean with warm water, soap, or detergent with our Sparta® 40521 Cutting Board Brush and dry immediately. Never allow water to remain on block.
- When it is necessary to remove stubborn stains or cutting marks, use scouring powder, steel wool, or sandpaper. Apply mineral oil to penetrate all surfaces for five minutes before wiping off. This procedure will prevent cracking and preserve your butcher block.
- Excessive dryness or humidity can cause cracks or warping. Cracks should be filled immediately with food safe wood filler, sanded, and reoiled.
- Prevent hazardous cross-contamination with our Spectrum® color-coded line of brushes. The Spectrum® line of brushes meets HACCP and FDA guidelines for foodservice hygiene and product safety. See page 302 for more information on the Spectrum® line.
