GLASS RACK SIZING GUIDE

Instructions:

1. Place glass upside down on top of the middle circle of the sizing guide; center of the glass (or the stem on stemware) should be over the center of the guide
2. Look down on the base of the glass
3. Note the smallest square on the guide where the largest outside diameter of your glass lines up completely within the square without touching it — this is the number of compartments your rack needs to have
4. Place lip of glass against the base line of the vertical guide on the left-hand side of the page with the base/foot of the glass pointing straight up towards the top of the page
5. While holding the glass against the vertical guide, note where the base/foot of the glass lines up on the vertical guide — the next line above the base/foot on the guide indicates the number of extenders your rack will require
6. For glasses larger in diameter or height than this guide, please refer to the Glass Rack Compatibility Charts on pages 358-366
